Numen Cyber

## 1 SUMMARY

Numen Cyber Technology was commissioned by JasmyCoin users to review the ecological implementation of JasmyCoin's project. The assessment was carried out in accordance with our systematic approach to assess potential security issues based on client requirements. The report analysed both on-chain and off-chain data information for JasmyCoin and found some security risks.

**The project process described in the JasmyCoin Whitepaper does not match the reality; the data ecosystem reward mechanism described in the Whitepaper does not match; a large number of Jasmy Tokens are distributed to exchanges or other EOA addresses for circulation through the official Jasmy address; and there are "Rat Trading".**

Numen Cyber

## 2 PROJECT RISKS

### 2.1 RISK ASSESSMENT METHODS

To standardise the assessment, we have defined the following terms based on the OWASP risk rating methodology, which is the gold standard for risk assessment using the following risk models

**Low risk:** no economic loss to users or projects, no substantial security risk.

**Medium risk:** can result in technical loss or commercial loss.

**High Risk:** Long-term information mismatch, resulting in financial loss to the user or project.

**Critical:** can result in substantial financial loss to the user or project.

### 2.2 RISK SUMMARY

Risk Levels	Findings	
Critical	1	
High	1	
Medium	2	 
Low	1	

Table 2.2.1

Table 2.2.2

## 2.3 MAIN FINDINGS

ID	Risk Levels	Name of findings
NVE-001	Medium	The project process described in the Whitepaper does not match the reality.
NVE-002	Medium	The data ecosystem reward mechanism described in the Whitepaper does not match.
NVE-003	High	A large number of Jasmy Tokens are distributed to exchanges or other EOA addresses for circulation through the official Jasmy address.
NVE-004	Low	Timing discrepancies in the project's operating model.
NVE-005	Critical	There is a "Rat Trading" situation

Table 2.3

## 3 JASMYCOIN PROJECT INFORMATION

### 3.1 OFFICIAL INFORMATION

#### 3.1.1 WEBSITE

[https://www.jasmy.co.jp/en\\_company.html](https://www.jasmy.co.jp/en_company.html)

#### 3.1.2 TWITTER

[https://twitter.com/jasmy\\_happiness](https://twitter.com/jasmy_happiness)

#### 3.1.3 WHITEPAPER

<https://www.jasmy.co.jp/images/whitepaper.pdf>

#### 3.1.4 IS THE WEBSITE WORKING PROPERLY

Yes

#### 3.1.5 AVAILABILITY OF SPECIFIC PRODUCT

Yes

#### 3.1.6 AVAILABILITY OF EXTERNAL AUDIT REPORT

Yes

<https://www.slowmist.com/security-audit-certificate.html?id=c328ea74548253d1cfc8985e12155648cf363cc28eaf21b6aefde4155258f7ba>

#### 3.1.7 AVAILABILITY OF TEAM INFORMATION

Official webpage with pictures and profiles of the team members

#### 3.1.8 AVAILABILITY OF RELATIVELY HIGH ANNUAL INTEREST RATES ON INVESTMENTS

No

#### 3.1.9 WHETHER THE DEPLOYER HAS A BAD HISTORY

No

#### 3.1.10 EXISTENCE OF A CONTRACT ADDRESS

Yes

<https://etherscan.io/address/0x7420B4b9a0110cdC71fB720908340C03F9Bc03EC>

#### 3.1.11 EXISTENCE OF UNVERIFIED CONTRACTS

No

### **3.1.12 DOES A SMART CONTRACT HAVE A PRIVILEGED ROLE**

A privileged role exists for the contract deployer, and the deployer address is the EOA address to which all Jasmy Tokens will be transferred after the deployer contract is deployed, and which later distributes the Jasmy Token to:

<https://etherscan.io/address/0xf4a5b232df2de4dd6ad613ba17c3113cef707be9>

### **3.1.13 IS THERE A HIGH HANDLING FEE**

No

### **3.1.14 IS LP SUPPLY LOCKED**

No

### **3.1.15 DOES THE HANDLING FEE COME FROM TORNADO OR TYPHOON**

No

### **3.1.16 WHETHER THE PROJECT OWNER HAS A HISTORY OF DISHONESTLY PROFITING FROM TRANSACTIONS**

The project made a large number of Token distributions during the JASMY Token issuance phase, and the distribution addresses were mainly divided into exchange addresses and EOA addresses. By judging the project's parties and playstyle, it was found that the project did not declare the specific role of its Token distributions, and that there was dishonest profit-making as these exchange and EOA addresses sold JASMY Token several times causing the price to fall.

### **3.1.17 IS THE CONTRACT CODE AT RISK**

The JASMY Token contract has been audited and there is no code-level security risk to the contract

### **3.1.18 HAS IT BEEN HACKED**

No

### **3.1.19 DO SMART CONTRACTS HAVE BACKDOORS**

No

### **3.1.20 AVAILABILITY OF INVESTMENT PARTNERSHIPS**

No

### 3.2 PROJECT WHITEPAPER INFORMATION

Link to the Whitepaper: <https://www.jasmy.co.jp/images/whitepaper.pdf>

Whitepaper released: 16 April 2020

The content of the WhitePaper is divided into 8 main items:

#### ① Introduction

Jasmy is a company that develops and delivers the Jasmy platform, an Internet of Things platform. When everything is connected to the Internet, the "clothing, food, housing and transport" that are part of people's lives will change dramatically. The mission is to provide the infrastructure for an environment where everyone can use data easily, securely and reliably.

#### ② Explaining the challenges of the new digital age

Addresses personal privacy, corporate privacy data, and data management limitations, respectively.

#### ③ Articulating the move towards a data society

It provides a platform for decentralised data, computing featuring distributed processing, decentralised networking and storage, respectively.

The focus is on Jasmy as a blockchain and IPFS (Interplanetary File System) and other decentralised technologies to provide networking and storage.

#### ④ Articulating solutions

**The development philosophy is the pursuit of data accessibility, value creation and innovation. Two types of data services are described:**

##### **First: SKC**

Distributed personal identification and data management service: the basic service of the Jasmy platform is to have a lockable locker ('personal data locker') that stores your data in a distributed memory.

SKC Its main functions are as follows:

- Identify users who can start using the platform and its services electronically. (Personal Identification and Authentication: Know Your Customer, hereinafter KYC) and registration functions.
- Users are able to actively decentralise, manage and store their personal data with Jasmy.net.
- When providing data, the user voluntarily authorises the transfer and tracking of the data Executable functions.

- When a company or organisation has permission from an individual to use their data, it is able to use that data as and when it is needed without having to keep the information associated with a specific individual.

## **Second: SG**

Another core service of the platform is SG, which makes it easy and secure to register devices such as IoT devices to a decentralised network using the personal ID created by the SKC, while providing an environment that can only be used by the device owner.

Smart Guardian Smart Guardian: SG has the following key features:

- Using the SKC function (Know Your Machine: KYM), specific devices registered in the network are linked to their owners without the need for personal identification or authentication.
- Functions that enable devices to securely issue and receive commands (orders) from their owners, such as sensing, sending and receiving measurement data and remote control.
- Thanks to the unique blockchain and decentralised management storage, the data generated by the device can be stored, managed and used securely and only by the owner.

## **Jasmynet**

Jasmynet is a network environment in which only Jasmy and authorised affiliate companies can participate. The participants are a limited number of companies, mainly large ones, and anyone can participate in the consensus algorithm (blockchain data processing) to keep the network secure and available. They can also write various data, keys, hashes and other records into the blocks. Each company can provide separate smart contracts and services, as well as a mechanism to write to Jasmy's services, allowing them to use common data to provide their services. This business model is Jasmy's own concept and Jasmy plans to patent the business model.

## **⑤ Explaining the Jasmy Ecosystem**

**The first step is to create a data ecosystem that forms a scalable ecosystem, illustrating the reward system and the Jasmy Token.**

**The reward system is as follows:**

**On Jasmy's platform, in order to obtain the provision of data generated by individuals, companies need to clarify the scope and purpose of the data and offer a reward in exchange for the provision. Such rewards must provide tangible value. The reward helps individuals to recognise the value of their**

**data and also motivates them to provide it. The value of such rewards will be linked to the quantity and quality of the data, and producers of personal data will be able to increase their awareness of their data by receiving higher rewards and information about the source of the rewards.**

#### ⑥ Data markets

Explaining the safe, secure and easy access to data for individuals and companies through Jasmy's platform business. to exchange data, foster innovation and become a global data marketplace that creates new value beyond company and industry boundaries.

#### ⑦ Roadmap

The roadmap is divided into four phases:

- Dissemination phase:

While leveraging Jasmy's core SKC/SG technology, Jasmy will actively work with initiative companies to gain access to end users of the platform by introducing IoT devices and developing new solutions. Through the application on the platform, the company can use blockchain to provide innovative solutions and reduce costs, such as labour costs and server usage fees. On the other hand, the individual users of the company's services will be able to use the services on a secure basis. By creating a system that benefits both the company and the user, the number of data locks will spread widely across different regions, ages and genders.

- Value growth phase:

As the number of users grows, Jasmy will drive an increase in the type and volume of personal data that can be exchanged. During the growth phase, Jasmy will shift its focus from increasing the number of data locks to increasing the number of companies participating in the platform. Jasmy will consolidate the best practices of the diffusion phase and use Jasmy's network effect to actively drive the development of new products and services with companies in different industries that have a user base.

- Ecosystem expansion phase:

Once personal data has evolved to the point where it can create value, an environment is created where individuals are fairly rewarded for providing their data. Individuals have an incentive to disclose their data because they are rewarded for disclosing their data to companies. Jasmy is only neutral and there is no centralisation of data.

- Data market creation phase:

Decentralised management of valuable personal data requires a secure environment for its use and individuals have the right to be appropriately rewarded for providing this personal data. An environment that enables this transparent use and rewards through licensing is the Jasmy Data Marketplace. The platform has been developed to enable individual users to easily and securely license data on the platform and to provide the marketplace with rich functionality. The aim is to enable the trading of data between individuals and companies and the strategic sharing of valuable data between companies, thereby creating value from the data and acting as a catalyst for the creation of new service models.◦

#### ⑧ Team

As described on the official website

Nummen Cyber

### 3.3 PROJECT PRODUCTS

The project's website and other channels did not exist until February 2023, but the JASMY Token issued by the project was distributed in large quantities in May 2021, mainly to exchanges and EOA addresses. tokens were distributed by the project's own personnel, while other users obtained them by purchasing them on exchanges.

The main purpose of the product (<https://www.jasmy.co.jp/thankfulness/plan/>) is to promote Japanese culture. The main functions of the product are to post information about the project, vote, select and support tasks, and to receive points for completing the tasks.

### 3.4 PROJECT START AND END TIMES

Start time: Based on the contract deployment time and Token release time, the project started on Oct-08-2020 07:54:39 AM +UTC

End time: Project is currently running

### 3.5 PROJECT OPERATING MODEL

The operating model described in the Whitepaper:

The project Whitepaper shows that the project is a company that develops and delivers the Jasmy platform, an Internet of Things platform. When everything is connected to the Internet, the "clothing, food, housing and transport" that are part of people's lives will change dramatically. The mission is to provide the infrastructure for an environment where everyone can use data easily, securely and reliably

The project focuses on the implementation of a decentralised data provisioning platform, computing featuring distributed processing, decentralised networking and storage using Jasmy's core SKC/SG technology.

The actual operating model for the project until February 2023:

Call for users to purchase JASMY Token by heavily promoting the project.

### 3.6 PROJECT PLAY RESEARCH

Users buy and sell JASMY Token through the CEX and DEX exchanges, which are distributed by the project's contract deployer address.

Until February 2023, the JasmyCoin project play is only for users to buy and sell JASMY Token on the exchanges, so only one play is for users to buy and sell Token.

Three types of users currently exist in the JasmyCoin project:

1. Users in the project mainly buy and sell JASMY Token.
2. users post information through a registered account
3. users vote through the registered website

JASMY Token can currently be traded on all CEX and DEX exchanges:

	Name	CEX/DEX
1	Binance	CEX
2	Coinbase Exchange	CEX
3	KuCoin	CEX
4	Kraken	CEX
5	Bitfinex	CEX
6	Bithumb	CEX
7	Bittrex	CEX
8	Gate.io	CEX
9	Huobi	CEX
10	Bybit	CEX

11	Bitget	CEX
12	Crypto.com Exchange	CEX
13	LBank	CEX
14	Phemex	CEX
15	BKEX	CEX
16	Tokocrypto	CEX
17	WazirX	CEX
18	MEXC	CEX
19	LATOKEN	CEX
20	BitMart	CEX
21	Dex-Trade	CEX
22	CoinDCX	CEX
23	NovaDAX	CEX
24	CEX.IO	CEX
25	CoinDCX	CEX
26	Bitrue	CEX
27	BTCEX	CEX
28	WhiteBIT	CEX
29	Nominex	CEX
30	Pionex	CEX

31	Nominex	CEX
32	Hotcoin Global	CEX
33	DigiFinex	CEX
34	Deepcoin	CEX
35	Tapbit	CEX
36	Bibox	CEX
37	XT.COM	CEX
38	Dcoin	CEX
39	Bitay	CEX
40	CoinTiger	CEX
41	Mandala Exchange	CEX
42	BingX	CEX
43	Cointr Pro	CEX
44	Hotbit	CEX
45	ZT	CEX
46	Jubi	CEX
47	SuperEx	CEX
48	Uniswap (V3)	DEX
49	SushiSwap	DEX
50	SaitaSwap	DEX

Table 1.3: All CEX and DEX exchanges where trading can take place

### 3.7 THE ROLE OF THE USER IN THE PROJECT

The project has only two roles in the JasmyCoin project until February 2023: the first is the official JASMY Token publisher; the second is the ordinary user who buys and sells JASMY Tokens.

Three types of users currently exist in the JasmyCoin project:

1. Users in the project mainly buy and sell JASMY Token.
2. Users post information through a registered account
3. Users vote through the registered website

### 3.8 THE PROJECT MAINLY INVOLVES WALLETS AND CONTRACT

#### ADDRESSES

Only one Token address exists for the JasmyCoin project and no other contracts have been released. The current addresses involved are as follows:

JASMY Token contract address:

0x7420B4b9a0110cdC71fB720908340C03F9Bc03EC

JASMY Token Contract Deployment Address:

0xf4a5b232DF2De4dd6ad613ba17C3113CEf707BE9

**JASMY Token Contract Deployer Funding Source:**  
**0xf4747b84b7175bA7022eE1d4a07daBdbd6f633Ad**

### 3.9 TOKEN RELEASES AND PRICE HIGHS

Token Release Time: Dec-26-2019 05:59:52 AM +UTC

Token price highs: 2021-02-26 4.2929 \$

### 3.10 AVAILABILITY OF PUBLIC OFFERING ADDRESS

No public address found in the official JasmyCoin community

### 3.11 TEAM MEMBERS

The team members, as published through the official website and Whitepaper, are as follows:

代表取締役  
安藤 国威

- ・ ソニー(株)代表取締役社長兼COO、ソニー・エンジニアリング・アンド・マニュファクチャリング・オブ・アメリカ社長兼COO、ソニーフィナンシャルホールディングス(株)代表取締役会長兼ソニー生命保険(株)取締役会長、経産省「フロンティア人材研究会」座長などを歴任
- ・ 2016年4月に当社代表取締役に就任
- ・ 現在、一般社団法人Japan Innovation Network理事、公立大学法人長野県立大学理事長など

代表取締役社長  
佐藤 一雅

- ・ ソニースタイルドットコム・ジャパン(株)代表取締役社長、ソニーマーケティング(株)執行役員兼ソニースタイルカンパニープレジデント、ソニースタイル・ジャパン(株)代表取締役社長兼ソニーマーケティング(株)執行役員、ソニー(株)クリエイティブセンター長、株式会社BJIT代表取締役社長などを歴任
- ・ 2016年4月に当社取締役、2018年11月に当社代表取締役社長に就任

CFO  
原田 浩志

- ・ あずさ監査法人にて、放送業、建設業、IT業、製造業等幅広い業種の上場企業を中心とした法定監査業務に従事
- ・ その知見を活かして、上場準備企業の監査、支援業務などにも数多く携わり、担当クライアントの東証ジャスダック市場への上場も経験
- ・ 公認会計士（登録番号30168） 日本公認会計士協会会員

**森田 直：セキュリティ統括 兼 シニアストラテジスト (CISSP)**

ソニー株式会社にて、高速チップマウンター(Cellular Mounter)の開発、FeliCaカード、おサイフケータイチップ開発、NFC技術開発とその国際標準化を推進し、NFC Forumの認証プログラム策定を主導、Chief Distinguished Engineer(CDE)としてセキュリティ技術コミュニティを運営。

また、ソニーコンピュータサイエンス研究所においては、OES（オープンエネルギーシステム）プロジェクトを主導しオープンシステムストラテジストとして、沖縄で直流マイクログリッドシステムの実証実験を実施。その他、独立行政法人科学技術振興機構(JST CREST) DEOSプロジェクトで推進委員。日本規格協会における活動でIEC TC65 WG4エキスパートとして規格策定に参加。DEOS協会の標準化部会会主としてISO/IEC 62853の活用研究を進める。2020年よりジャスミーのシニア・ストラテジスト。

**萩原 崇：取締役 兼 ソフトウェア開発統括**

ソニー株式会社にて、コンシューマー製品のソフトウェア商品設計に従事し、長年 PC/VAIOの開発設計を担当。2000年にソニーデジタルネットワークアプリケーションズ株式会社 (SDNA) 代表取締役社長。VAIO&Mobile事業本部副本部長を経て、2015年にヴィジョンアーツ株式会社代表取締役社長に就任。クラウド技術をベースにした様々なシステム構築事業をグループ内各社に展開。2020年よりジャスミーのソフトウェア開発統括。

**Sheng Guo：Jasmy Softech (ジャスミーのソフト開発会社) Chief Information Officer/Enterprise Architect**

・航空、電気通信、および公共部門を中心に注目度の高い様々なITプロジェクトに従事。

・2007年から2010年の間はシンガポール民間航空局(CAAS)の長距離レーダー・ディスプレイシステム(LORADS)III高度航空交通管理(ATM)システムに取り組む。

・2010年から2017年にかけて、オーストラリア気象局の太平洋気候・海洋支援プログラム(COSPac)におけるIT開発を管理・主導。

・2017年から2018年の間にオーストラリア国立ブロードバンドネットワーク(NBN)で光ファイバーネットワークのロールアウトに取り組む。

・2015年より、オーストラリアのソーシャルマップPTY LTDのディレクター。

・2020年より、Jasmy Projectに参画

**柿沼 英彦：執行役員（商品サービス企画、経営企画・マーケティング担当）**

㈱住友銀行（現 ㈱三井住友銀行）入社後、ジャーナルホームネット㈱（現 ㈱NTTぷらら）へ出向し、ISP事業の立ち上げに従事。ソニー㈱に転職した後、ソニー銀行㈱の会社設立、事業立ち上げに携わり、ソニースタイルドットコム・ジャパン㈱およびソニーマーケティング㈱、ソニー生命保険㈱にてマーケティング・サービス開発を担当。その後㈱イオン銀行の商品開発部長、営業企画部長を経て、イオン・アリアンツ生命保険㈱の会社設立、事業立ち上げを行い取締役就任。2022年2月よりジャスミーに参画

## 4 JASMYCOIN OFF-CHAIN INFORMATION

### 4.1 POSITION OF EXISTING PERSONNEL IN PLAY

The project is until February 2023, the JasmyCoin project play is just users buying and selling JASMY Token on the exchange, so only one play is users buying and selling Token.

### 4.2 USER AND PROJECT COMMUNICATORS

JasmyCoin communicates with the project mainly through Telegram.

<https://t.me/OfficialJasmyUniverse>

<https://t.me/JASMYChina>

<https://t.me/vitucl>

[https://t.me/officialjasmy\\_universechat](https://t.me/officialjasmy_universechat)

<https://t.me/JasmyOfficialBot>

### 4.3 PROJECT MARKETING PERSONNEL

Jasmy Operations personnel: [https://www.jasmy.co.jp/en\\_company.html](https://www.jasmy.co.jp/en_company.html)  
(Kazumasa Sato)

### 4.4 PROJECT TECHNICIAN

The same code and introduction exists for the JasmyCoin project on Github, for the official document <https://github.com/JasmyCoin>, which was analyzed to obtain the following information:

E-mail: [contact@bwe-inc.jp](mailto:contact@bwe-inc.jp);

Probably the technical staff of the project party Github:

## 5 JASMYCOIN ON-CHAIN TRACING

### 5.1 TRACKING OF VARIOUS FINANCIAL FLOWS

Only JASMY Token contract addresses and contract deployers exist for the JasmyCoin project, there are no public offering addresses or vault addresses. Here is a count of JASMY Token holders and the number of holdings:

	HolderAddress	Public Tag	Balance
1	0xf977814e90da44bfa03b6295a0616a897441acec	Binance 8	10000000000
2	0xf8ef081d1e889dfce9e20d84a97a02414158445a	Unknown contract	2875000100
3	0x5a52e96bacdabb82fd05763e25335261b270efcb	Binance 28	2500000000
4	0xf4a5b232df2de4dd6ad613ba17c3113cef707be9	Jasmy: Deployer	2400000000

Table 5.1: JASMY Token Holder Statistics

## 5.2 PUBLIC OFFERINGS ADDRESS TRACKING

JasmyCoin project does not have a public offering address

## 5.3 JASMY TOKEN HOLDS RISKS

Since the project sends the total amount of JASMY Token to the contract deployer after the contract is released, there are risks in the holdings and trading volumes of JASMY Token.

After the contract deployer distributes the funds several times, the Token holders are mainly exchange addresses and EOA addresses, and there is a risk that Tokens are concentrated in EOA addresses.

## 5.4 SOURCES OF HANDLING FEE

**JASMY Contract Deployer**0xf4a5b232DF2De4dd6ad613ba17C3113CEf707BE9  
**Handling Fee Sources:**

## 5.6 INITIAL LIQUIDITY ADDED

Initial liquidity added address:

0x4d1Eff861316396dD1915F69B49f4C2d7B11590d

This address JASMY funding source:

0xFe2FFf5C0B676a873D05e2066bC685375Ea4b038 (Kraken: JASMY)

## 5.7 LARGE EXCHANGE AT HIGH PRICE

### 5.7.1 HIGH PRICE POINT TIMELINE

There have been several price fluctuations since the JASMY token was issued, and the high price drops were counted.

Time	Price
2022-07-09---2022-07-11	0.0119---0.00918
2022-07-19---2022-07-26	0.0106---0.00803
2022-08-16---2022-08-20	0.0117---0.00905
2022-09-09---2022-10-22	0.0096---0.00424
2022-11-04---2022-11-09	0.00607---0.00342

Table 5.7.1: Price highs down statistics

### 5.7.2 PRICE HIGH DOWN ADDRESS ANALYSIS AND LABEL STATISTICS

Analysis of **JASMY Token** sent to high price **DEX** exchange addresses and tagging statistics: [Price highs falling](#)

The table here is an analysis of addresses that cashed out **JASMY Token** from exchanges at high price points. Since **JASMY Token** must be exchanged for other tokens through exchanges if it is to be cashed out, all addresses and transactions were analyzed by determining the time period when prices dropped at high points. The analysis of the data shows that there are multiple addresses that cash out **JASMY Token** at the high price point, and some of the addresses are funded by the exchange or the **JASMY Token** contract deployer, and multiple addresses do not perform other trading operations after receiving **JASMY Token**, but only cash out **JASMY Token** at the high price point. So there is the possibility of cashing out by official **JasmyCoin** personnel. Due to the large amount of data, all addresses are tagged here (**Tag**), and the operation content corresponding to a certain address can be clearly known through tags. For example, the **JASMY User 7** tag is: **JASMY Token** originated from the exchange, has a large capital, has been exchanged several times, and may have been traded after the initial token distribution. Therefore, the address tagged with this tag may be an official **JasmyCoin** staff member who is carrying out a cash out operation. The address in the **JASMY User 6** tag is also highly likely to be the work of an official.

All tags are classified as follows:

**EVM bot:** public tags tagged on the chain

**JASMY User 1:** Smaller funds or transactions

**JASMY User 2:** 2-10 transactions with pairs

**JASMY User 3:** Large number of transactions with pairs

**JASMY User 4:** Tokens originated from exchanges, sold in pairs with low funding and transactions

**JASMY User 5:** Token originated from an exchange, sold at the pair, less capital

**JASMY User 6:** Token originated from the exchange, sold in the pair, more funds and transactions, probably trading after the initial token distribution

**JASMY User 7:** Token originated from an exchange, large capital, multiple exchanges, probably traded after initial token distribution

	Holder Address	Tag	Source

Table 5.7.2: Price highs falling

### 5.7.3 DETAILED ANALYSIS OF THE REDEMPTION ADDRESS

The exchange address gets the **JASMY Token** and converts the **JASMY Token** into ETH and USDT in the trading pair at the high price point. The main analysis of this table is for the address labeled **JASMY User 7** in Table 3.7.2, and the Token source, time, quantity and destination are analyzed for some addresses in this category:

Table content and meaning of expressions:

**Address:** The address where the JASMY Token price fell at a high point when the cash was cashed out Source of funds for the exchange

**Source:** The source of JASMY Token at the address and the exchange label, the number of JASMY Token received and the number after exchange

**Time:** The time when the JASMY Token was sourced and the time interval when it was cashed

**Flow:** where the funds went after the cash out

Address	Source	Time	Flow

Table 5.7.3: Detailed analysis of the redemption address

## 6 SUMMARY DATA ANALYSIS

By analyzing the address from the price high to the low point and the Token initial distribution address, we get the address related to the price high point drop and the Token initial distribution, the table analysis content is mainly JASMY Token price high point drop when cashing in the address of the source of funds for the contract deployer, this type of address may be the official address of JasmyCoin or the project informed personnel, (and in the process of analysis, it was found that multiple small amounts of money were collected at address 0x1A48e31e7411CC2DA0eF58159ff42C78872E9917 and subsequently transferred out, which may be the official address for the collection of funds.) The source, time, amount and destination of Token were analyzed for this type of address.

Table content and meaning of expression:

**Address:** The address where the JASMY Token price dropped at a high point when the cash was cashed out Funding source for the contract deployer

**Source:** the address JASMY Token source, JASMY Token source of each layer of the transfer address

**Time:** the time when the JASMY Token was sourced and the time interval when it was cashed out

**Tokens:** The number of JASMY Tokens received at this address and the amount of money sent after cashing out

**Flow:** where the funds will go after cashing out

Table 6.1: Addresses related to the high price drop and the initial token offering

## 7 CONCLUSION

Summary of the main elements and highlights of this analysis:

### ① **The project process described in the Whitepaper does not correspond to the actual situation**

The Whitepaper reads:

"While leveraging our core SKC/SG technology, we will actively work with initiative companies to gain access to end users of the platform by introducing IoT devices and developing new solutions. Through applications on the platform, the company can use blockchain to provide innovative solutions and reduce costs such as labour costs and server usage fees. On the other hand, individual users of the company's services will be able to use the services on a secure basis. By creating a system that benefits both the company and the user, the number of data locks will spread widely across different regions, ages and genders."

**Reality:** Analysis of the market and data reveals no relevant official solutions provided using core SKC/SG technology, only the circulation of Jasmy Token on the exchange.

### ② **Mismatch of data ecosystem incentives described in the Whitepaper**

The Whitepaper reads as follows:

"On Jasmy's platform, in order to obtain the provision of data generated by individuals, companies need to clarify the scope and purpose of the data and give an incentive in exchange for the provision. Such rewards must provide tangible value. The reward helps individuals to recognise the value of their data and also motivates them to provide it. The value of such rewards will be linked to the quantity and quality of the data, and producers of personal data will be able to increase their awareness of their data by receiving higher rewards and information about the source of the rewards."

**Reality:** In the Jasmy platform, the scope and purpose of the data do not appear, and the number of rewards and the form of distribution are not stated

### ③ **A large number of Jasmy Tokens are distributed to exchanges or other EOA addresses for circulation via the official Jasmy address**

A large number of Jasmy Tokens are distributed to exchanges or other EOA addresses for circulation via official Jasmy addresses, but Jasmy does not officially declare the addresses and roles of these Token distributions, and there are cases of multiple addresses cashing out after distribution, which is seriously inconsistent with the project's model.

#### ④ Time differences in the project operating model

The operating model described in the Whitepaper on time differences in the project's operating model:

"Looking through the project Whitepaper, the project is a company that develops and delivers the Jasmy platform, an Internet of Things platform. When everything is connected to the internet, the "clothing, food, housing and transport" that are part of people's lives will change dramatically. The mission is to provide the infrastructure for an environment where everyone can use data easily, safely and securely"

Reality: the actual mode of operation of the project until February 2023 was all about calling on users to buy JASMY Token by heavily advertising the project. but the project Token has already started to circulate in the market in large quantities in 2020, with the circulating funds being continuously distributed to exchange addresses and EOA addresses through contract deployment addresses.

#### ⑤ On-chain data analysis tracking, this section focuses on the initial JASMY Token funding allocation and when the JASMY Token price falls at high points:

##### First: JASMY Token Initial Funding Distribution

This part is mainly after the JASMY Token contract is deployed, the JASMY Token contract will send all tokens to the deployer, who will then go on to distribute JASMY Token to other addresses. By tracing the distribution addresses in four layers, it is found that the deployer mainly distributes JASMY Token to centralised exchanges, and some Tokens are sent to on-chain addresses.

##### Second: JASMY Token prices fall at high points

This section focuses on the addresses that cashed Tokens from decentralised exchanges during the time period when the JASMY Token price was at its high point of decline. The analysis reveals that there were multiple addresses cashing out Tokens from decentralized exchanges during the high point of the JASMY Token price drop, and that the funds for the cashing out of JASMY Token came from the exchange and the contract deployer of the initial funds allocation, it should be noted that the JASMY Token received by multiple addresses before the cashing out had not been circulated, so the JASMY Token price drops could be deliberate manipulation by official personnel.

Analysis of the flow of funds after the JASMY Token was cashed out also reveals that it may have been the address of the project's cashed out aggregated funds. (See Table 4.1 for details)

This JasmyCoin analysis report focuses on the on-chain and off-chain information of JasmyCoin. In general, JasmyCoin has experienced several price drops since the

issuance of the Token, and when the price dropped, there were contract deployers distributing Token addresses for Token cashing on the exchange. In addition, the project's ecology and the transfer of funds do not correspond to the actual situation.

**Possible "Rat Trading" addresses (see Table 5.7.2, Table 5.7.3, Table 6.1 for more information):**
